

## DIRECTIONS:

W Protection was designed to be used with dry hair.

Before a thermal treatment, such as: Brushing, Straightening, Relaxation.

- On clean and dry hair, spray **W Protection** thoroughly through the entire hair and spread it with a brush. Continue with the normal procedure of the treatment as desired.

When doing a Nanoplasty procedure, during the flat iron step, spray at the tips of the hair strands that are not sealing well.

### SIZES & EFFICIENCY

60mL = 240 Sprays
