

Treatment - Express Straightening

- Raspberry Hair Vinegar -

Powerful Hair pH Stabiliser

Indications:

Post-Colouring, Post-Bleaching, Post-Nanoplasty, and as an Express Straightening

- Neutralises hair's odour after Nanoplasty (especially for blondes);
- Removes oiliness from the scalp after the Nanoplasty procedure;
- Prevents the formation of dandruff after Nanoplasty;
- Sealing cuticles and providing a high-impact gloss.

DIRECTIONS for Post-Colouring and Post-Bleaching:

- 1. After Colouring or Bleaching the hair, wash thoroughly the hair with a **Floractive's Shampoo** of your choice and remove all the chemicals;
- 2. With the aid of a towel and dryer, remove the excess water;
- 3. Apply **Raspberry Hair Vinegar** on the entire hair, use a comb to distribute the product evenly;
- 4. Leave on the hair for 5 minutes;
- 5. Wash the hair with a Floractive's Shampoo and Conditioner of your choice.
- 6. Dry the hair and finish as desired.

DIRECTIONS for Post-Nanoplasty:

- 1. After the iron step of Nanoplasty, wash the hair with a **Floractive's Conditioner** of your choice;
- 2. With the aid of a towel and dryer, remove the excess water;
- 3. Apply **Raspberry Hair Vinegar** on the entire hair, use a comb to distribute the product evenly;
- 4. Leave on the hair for 5 minutes;
- 5. Dry the hair and apply a few drops of the **Floractive Oil** of your choice on the palms of your hands and distribute them along the entire length of the hair strands.

DIRECTIONS for Express Straightening (45-60min):

- 1. With dry hair, apply well (leave it damp) the **Raspberry Hair Vinegar** on the entire hair, use a comb to distribute the product evenly;
- 2. Leave on the hair for 15-20 minutes;
- 3. Afterwards, rinse <u>only the excess</u> product from the hair. Try to leave around 20% of the product on the hair;
- 4. With the aid of a hairdryer, dry the hair completely, without the use of a brush or comb, <u>dry the</u> hair completely;
- 5. Heat the flat iron at a temperature ranging from 180°C to 250°C depending on the degree of curly, thickness, and density of the strands. These temperatures are guidelines and require technical analysis from the hairstylist. Check the temperature for any hair shaft lightening after the first's sections. Flat iron in **thick sections** from 3 to 5 times depending on the amount of straightness desired.
